

Art. 8401.2 Melting tank Easy RVS

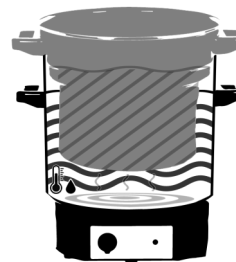

Directly heated kettle with a stainless steel pan with a capacity of 27 liters. The lid, handles, and housing are made of plastic. When heating paraffin directly, plastic parts may be affected if used intensively or incorrectly. The kettle can optionally be fitted with an 20L enamel insert pan (art. 8401.01) for indirect heating and an insulation blanket (art. 8401.04).

Optional Insulation Blanket (art 8401.04)

Optional 20L Enamel Insert Pan (art. 8401.01)

When using the insert pan, the melting kettle is filled with approximately 11 liters of water, and the insert pan is filled with the wax to be melted. This setup provides indirect heating.

Kettle Capacity: 27 liters

Height: 480 mm

Depth: 300 mm

Diameter: 350 mm

Overheating Protection: Yes

Thermostat Setting: 30 - 100 °C *

Power Requirement: 1800 watts / 230 volts

Lid: Yes

Insulation Blanket: Yes, optional

* For direct heating, the temperature setting may differ from the actual temperature. This is inherent to melting paraffin. Please read the user manual carefully.
