

Art. 8451 Melting tank Louis

Specifically designed for melting paraffin.

A fast, safe, and above all, user-friendly melting tank. The stainless steel pan has a capacity of 27L and features bottom and side heating. The boiler includes a heated drain valve, eliminating blockages. It comes with an insulating cover and lid. With a relatively low power consumption of 940W, the boiler is energy-efficient and allows multiple boilers to be connected to a single circuit.

Heated drain valve

Stainless inside pan 27L

Tankcapacity:	27 liter	Thermostart setting :	30 - 100 °C
Height:	480 mm	Power requirements:	940 Watt / 230 Volt
Depth:	300 mm	Closing lid:	Yes
Diameter:	350 mm	Insulationblanket:	Yes
Overheating security:	Yes		

*** With direct heating, the temperature setting may differ from the actual temperature. This is inherent to the process of melting paraffin. Please read the instruction manual carefully.**
