

Art. 8401.8 Pouring set Prof Stainless

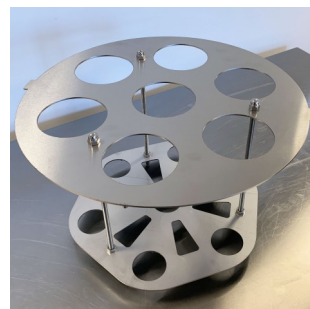

Indirectly Heated Stainless Steel Boiler with 7 Pouring Cans for Safe (Bain-Marie) and Convenient Production of Multi-Colored Poured Candles. This setup ensures that the desired color is always readily available. The pouring cans have a capacity of 1.5 liters each, with the centrally positioned can slightly larger, offering a capacity of 1.8 liters. The boiler can optionally be equipped with an insulating cover and stainless steel lids for the pouring cans.
