

Art. 8669 SH Duo melting tank stainless

Fully stainless steel melting kettle for au-bain-marie melting of paraffin. The SH Duo is equipped with modern heating technology, double-walled, and surrounded by insulation material, resulting in very low energy consumption. Fitted with an adjustable thermostat, dry-boil protection, and an extra-long power cord. Multiple insert plates available. Optionally also available with (swivel) wheels.

Above: The technology is completely concealed, making the kettle very durable.

Right: Multiple configurations are possible.
