

Art. 8725.03 Tapering melter for dinner candles
Device to give dinner candles a tapered bottom.
Power: 40 watts.

Instructions for Use:

- Place the melter on a sturdy surface in a dry environment.
- Place a collection tray under the outlet.
- Plug the device into a grounded socket, and it will start heating.
- After approximately half an hour, the device will be sufficiently heated for use.
- Insert the dinner candles into the tapered melter and melt the desired end of the candle.
- After melting, unplug the device and allow it to cool.
- The device is easy to clean with kitchen paper while still warm.
- Never bring the device into contact with water!
